

Tampa International Airport's Baggage Screening/Security Enhancement Project

- Central to Tampa International Airport's commitment to Baggage and Security Screening enhancements was a long-term plan that envisioned a Landside Terminal Baggage Handling System (BHS) with eight EDS screening loops and multiple Airside Terminal Sort Systems.
- Brock Solutions was contracted to design and implement a complete baggage handling control system for the four east side EDS loops in the Landside Terminal, as well as for the BHSs for the Airside A and Airside C Terminals.
