

Bringing the Passenger and Baggage Worlds Together

- SmartSuite is a collection of modules that combine to provide comprehensive solutions for passenger and baggage processing.

Tangible Benefits for Airlines and Airports

- Total visibility through a centralized database that stores a detailed life cycle about each passenger and checked bag. Information is accessed via web-based searches and reporting.
- Lower costs by automating labour-intensive processes, reducing delayed bags, and improving on-time flight departures.
- Enhance speed and accuracy of security processes through automated boarding pass validation and in-line EDS (Explosive Detection System) solutions.
- Improve passenger experience with shorter check-in times and improved communications.

SmartSuite Modules

SmartBag
Baggage Reconciliation;
Baggage Recovery;
Inbound Scanning

SmartConnect
Centralized Airline
Message Broker

SmartControl
Dependable Baggage
Handling Control
Systems

SmartDrop
Rapid Bag Drop;
BIWIS (Baggage Image
and Weight Identification
System)

SmartNotify
Dynamic Airline-to-
Passenger
Communications

SmartPass
Boarding Pass
Validation and
Passenger Tracking

SmartShip
Shipment and
Document tracking

SmartSort
Proven, Accurate
Sortation Software

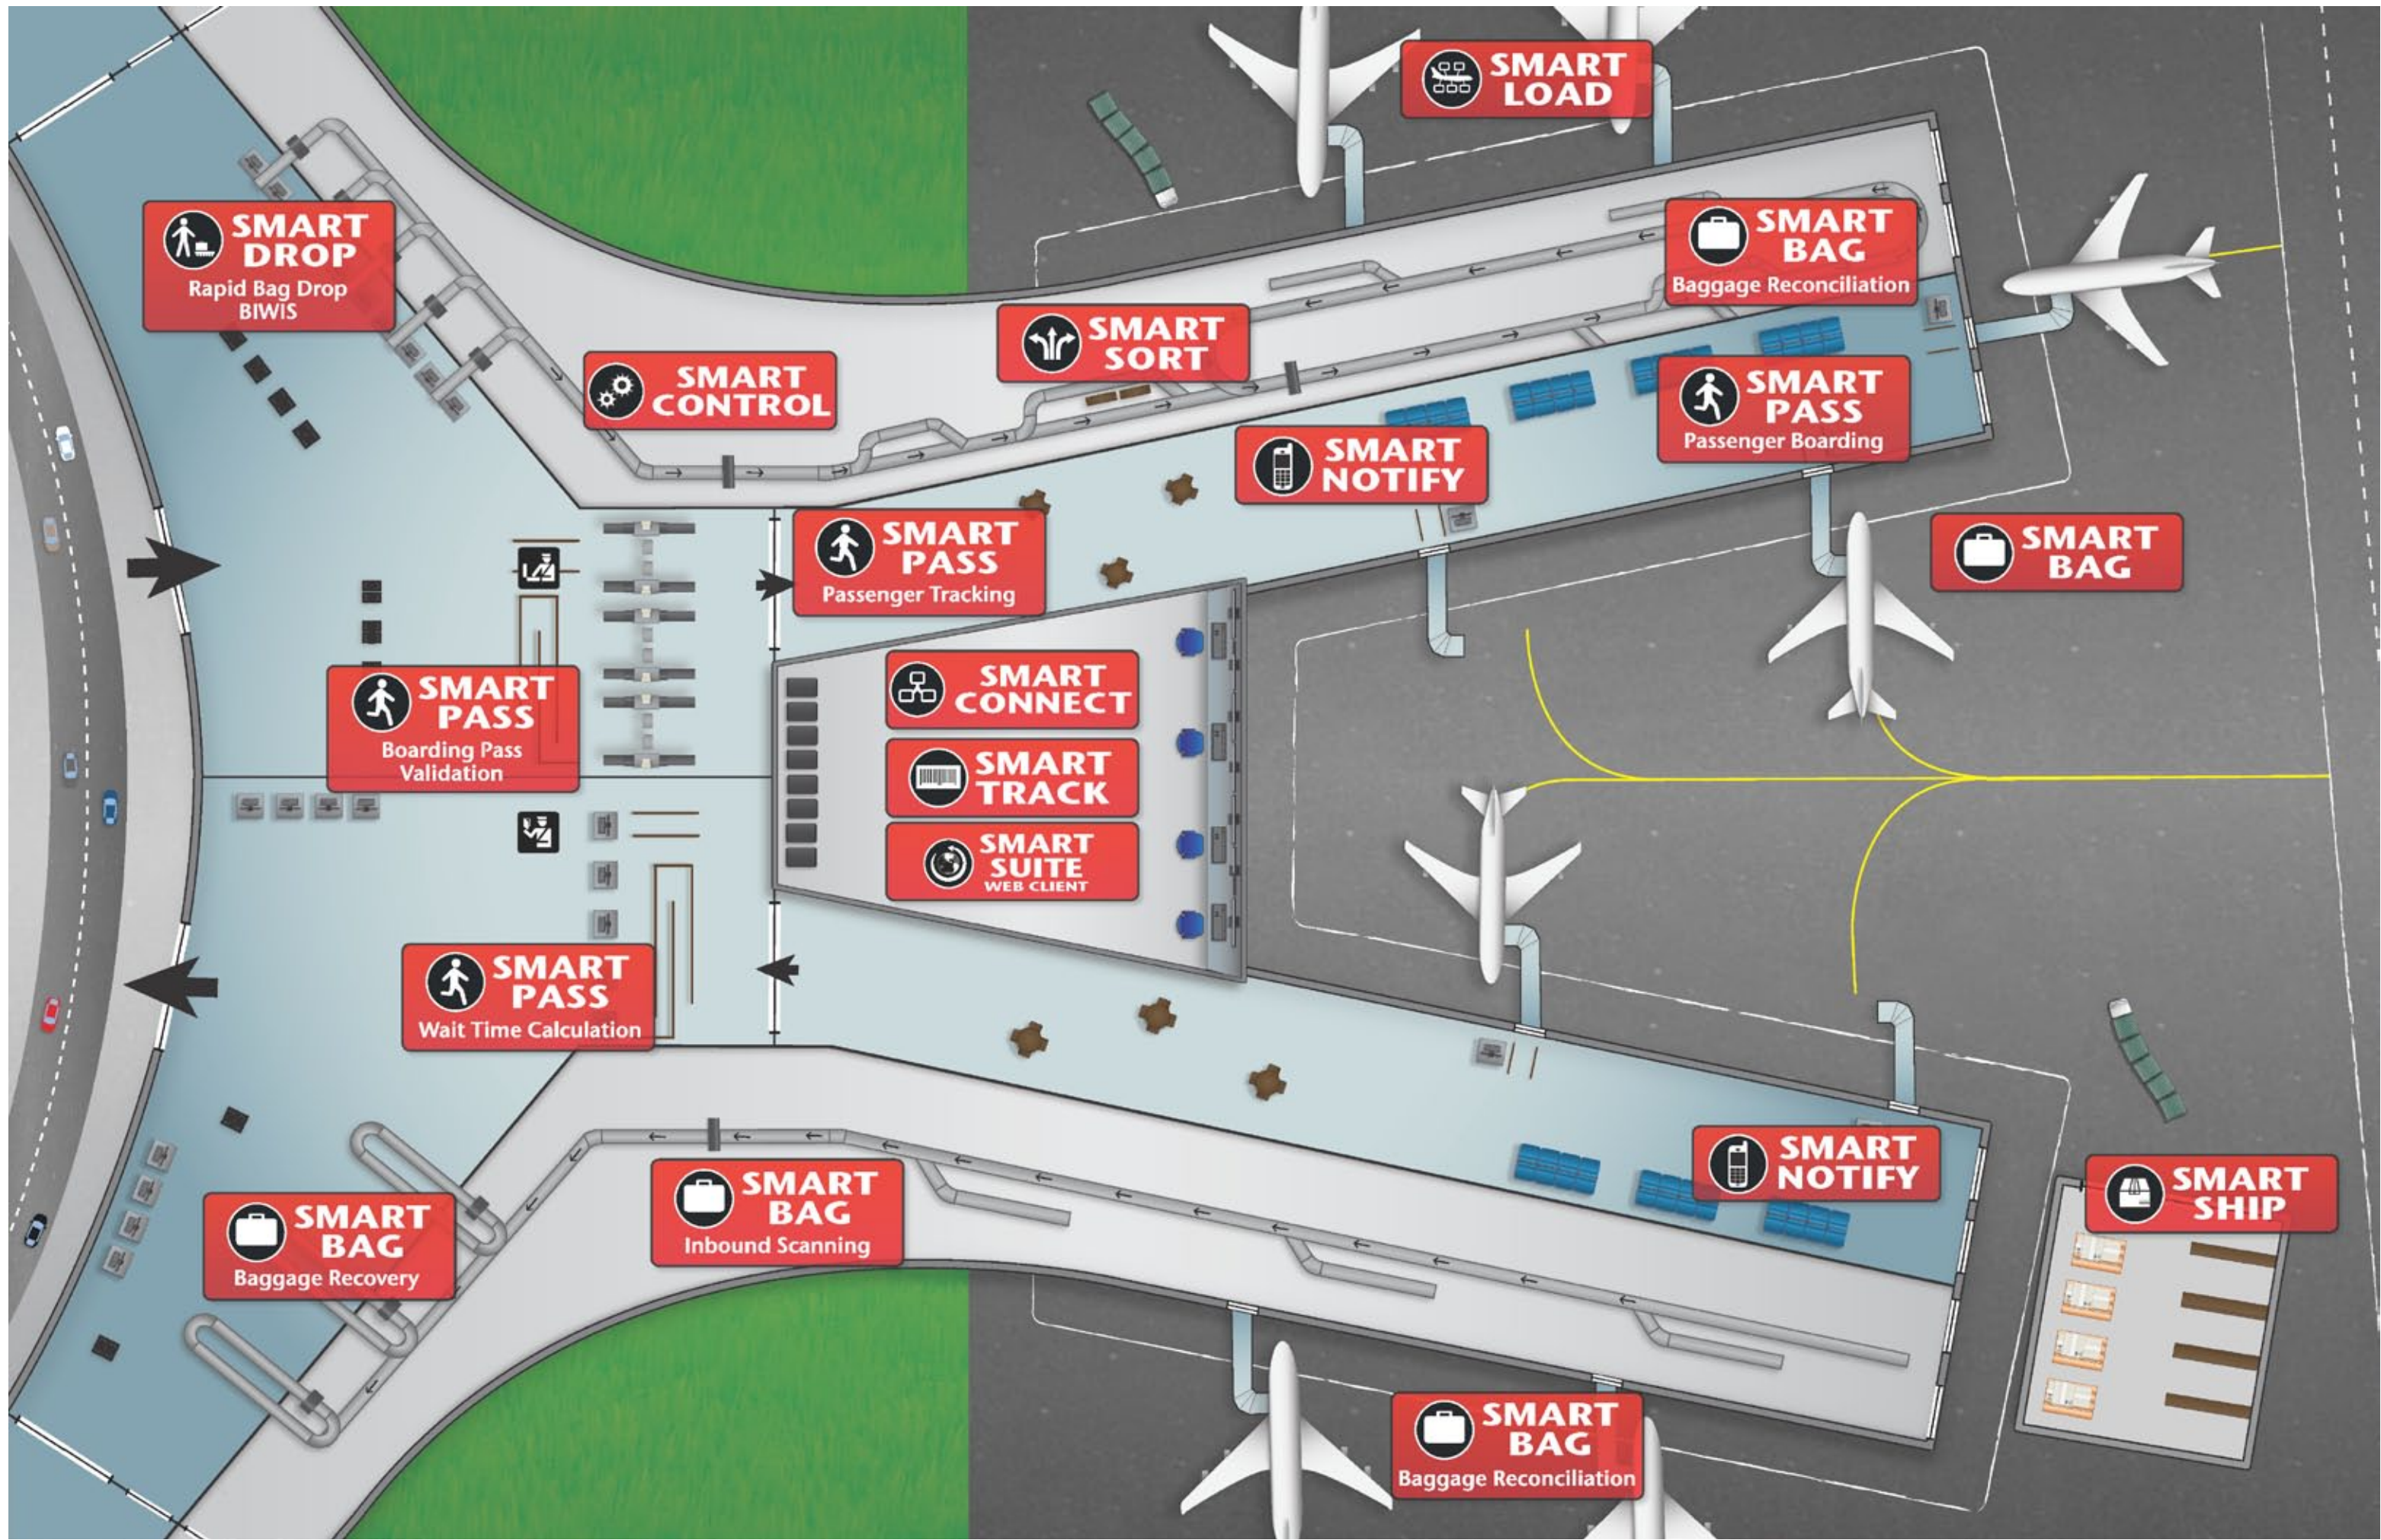

SmartTrack
Professional Asset
Tracking

"Air Canada's relationship with Brock Solutions started as a pilot project that has evolved into a partnership based on the concept of implementing a suite of applications that have allowed us to improve the efficiency of the baggage drop off process, the forwarding of delayed bags, the tracking of bags, as well as an automated means to update our customers of their flight status. We continue to be impressed with Brock's knowledge of the industry, their creative solutions and their ability to deliver integrated applications with a very intuitive user interface." - Martin Hoy, Senior Director, Airports

Fully Integrated Solutions

- **Centralized** - Regardless of the modules installed, all SmartSuite data is available through a single web-based client.
- **Scalable** - All SmartSuite modules can be implemented on a single set of hardware. Start small and add additional resources as volume and requirements increase.
- **Flexible** - SmartSuite modules can be customized to meet unique airline requirements.

**SMART
SUITE**

All of the SmartSuite modules can be implemented as standalone systems or integrated with other SmartSuite modules, providing complete end-to-end tracking of passengers and their baggage.

About Brock Solutions

With the successful delivery of over 4,000 automation projects worldwide across vertical sectors, Brock Solutions is one of the largest real-time automated systems providers for transportation and logistics, heavy industry and manufacturing.

Brock entered the Aviation industry over a decade ago with SmartSort, and since then, through extensive collaboration with industry stakeholders, has developed an entire suite of solutions to address and resolve key industry problems by enhancing baggage handling and passenger processing practices and streamlining airport operations.

Brock Solutions is an IATA Strategic Partner and a Controls Engineering System Integrator Hall of Fame member.
