

Cosmetics Manufacturing Upgrade Project – Panels and Batching

- Working towards a corporate goal of achieving standardization of manufacturing operations, modular recipe creation/handling, and accurate electronic data collection/distribution, a globally recognized cosmetics manufacturer purchased a new manufacturing platform known as a Skid for implementation at a production plant in Florence, Kentucky.
- Brock Solutions designed and built a Nema 4X-Rated, stainless-steel, 6-door (6 foot by 12 foot) Main Control Cabinet (MCC) to run the modular Batching Systems, 3 remote I/O field panels, several junction boxes, and 2 Industrial Human Machine Interface (HMI) work stations; and designed, programmed, and integrated the new batching system.
- Contact us at info@brocksolutions.com for the complete project profile.
