

New Distribution Center's Parcel Sortation System

- A leading national courier company launched a capital-grade new facility build as part of an on-going expansion program that included reducing concentration on manually intensive processes.
- Brock Solutions played a key role in addressing the reduction of manual operations by providing the design, development, and implementation of the Parcel Sortation System's PLC controls, HMIs, sortation software, and electrical instrumentation.
- Contact us at info@brocksolutions.com for the complete project profile.
