

Parenteral Facility Capping Line Commissioning, Qualification, and Computer System Validation Project

- A leading pharmaceutical manufacturing company purchased a complete automated Capping Line for installation at one of their parenteral facilities as part of a Diversified Hospital Care (DHC) Upgrade initiative. In order to put the Capping Line to use, the pharmaceutical manufacturer required that the various equipment and process operations be validated and qualified to meet all applicable regulatory compliance mandates.
- Brock Solutions was contracted to perform complete Validation/Qualification and Computer System Validation (CSV) activities. The Brock team consisted of a CQ/CSV Coordinator, an Automation Lead, a Quality Control Specialist, and Process Engineers.
